

WHY SICKKIDS NEEDS YOU:

OUR LIFE-CHANGING RESEARCH DEPENDS ON YOU

SickKids does more research than any children's hospital in Canada, 1/3 of it funded by donations. You're providing hope and new treatments to kids with aggressive cancers or unstoppable seizures.

OUR FAMILIES NEED HEALING SPACES

SickKids neonatal intensive care unit (NICU) treats more than 800 critically ill babies a year. Right now, families are confined to a taped-off area in overcrowded, ward-style rooms. A new NICU will offer privacy and more room for life-saving equipment.

OUR DOCTORS NEED THE LATEST TECHNOLOGY

Nearly 12,000 surgeries are performed at SickKids every year. Many are so complex, other hospitals can't do them. You are helping update operating suites more than 25 years old, putting the latest technology into SickKids surgeons' hands.

OUR BUILDING DOESN'T MATCH OUR CARE

Parts of SickKids are more than 70 years old, and don't meet modern building codes. By helping rebuild the hospital, you're creating a building as state-of-the-art as the care we offer the patients and families who come here.
